Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Claim 1

Documents EP-A-0 003 442 and WO-A-98 42929 already disclose a flexible wall lining comprising at least one phase change material, each of said at least one phase change material exhibiting a phase change at a temperature in the range from 5 °C to 40 °C (cf. page 3, line 24 to page 8, line 26 in EP-A-0 003 442 and page 5, line 27 to page 9, line 9 in WO-A-98/42929).

Therefore, the present application does not satisfy the criterion set forth in Article 33(2) PCT because the subject-matter of Claim 1 is not new.

2. Claims 2 to 10

The dependent claims 2 to 10 contain features which are also partly revealed in the above cited prior art (claims 2 to 5 and 10) or which form part of the normal consideration of the man skilled in the art. Therefore the subject matters of the dependent claims 2 to 10 either lack novelty or these dependent claims do not appear to contain any additional features which involve an inventive step when combined with the subject matter of any claim to which they refer.
